error:
point too steep

- when it has to be right

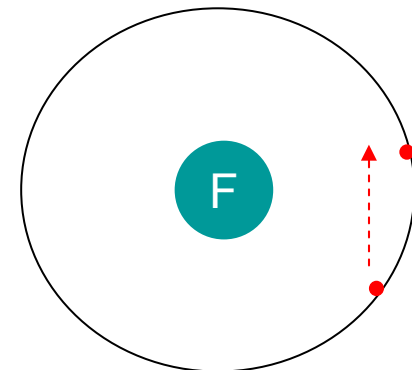

Toolkit Comfort Targeting Application situations

YES

Vertical Distance Only

Curved Surface,
Vertical Distance Only?

- when it has to be **right**

Toolkit Comfort Targeting Answers

- C** enter „1.00“ means $\Delta H = 1.00$ = height difference;
line length > 1.00

Laser turns vertically upwards →
best results on vertical planes

- when it has to be **right**

Toolkit Comfort Targeting Answers

D enter „1.00“ means $\Delta H = 1.00$ = height difference;
line length > 1.00

Laser turns vertically upwards →
best results on vertical planes

- when it has to be **right**

Toolkit Comfort Targeting Answers

E = C

enter „1.00“ means $\Delta H = 1.00$ = height difference;
line length > 1.00

F = D

→ To set out vertical distance only enter „0“ for
horizontal distance.
