

LEICA BLK2GO

HANDHELD IMAGING LASER SCANNER

RELEASE NOTES

FIRMWARE VERSION 2.0.2 – 17th JUNE, 2021

These Release Notes contain important information about the Leica BLK2GO new firmware version 2.0.2.

It is highly recommended to always use the latest version of the BLK2GO firmware and the BLK2GO Live app. For compatibility reasons, please use firmware version 2.0.2 with BLK2GO Live app version 1.2.5 (iOS) and 1.0 (Android) or later. There is no backward compatibility of BLK2GO firmware 2.0.2 with previous versions of Cyclone. For compatibility reasons, please use BLK2GO firmware version 2.0.2 with Cyclone REGISTER 360 v.2021 and Cyclone REGISTER 360 (BLK Edition) v.2021 or later.

The firmware can be downloaded from myWorld @ Leica Geosystems customer portal as well as from the website <https://shop.leica-geosystems.com/blk2go-firmware>.

WHAT'S NEW

- Faster and more deterministic static initialisation. It is still recommended to firmly hold the BLK2GO on the table stand while initialising (yellow blinking).
- Improved GrandSLAM tracking accuracy and robustness in low-feature environments.
- Improved latency in the trajectory streaming to BLK2GO Live app at the beginning of a scan.
- Improved system resistance to temperature changes.
- Improved USB-C connection stability.
- Device correctly identified as a Leica Geosystems device.
- General system stability improvements.

For details on how to update the firmware version on the BLK2GO, see the firmware guide available on myWorld @ Leica Geosystems customer portal and BLK2GO website. For additional support, please contact your local reseller for first level support.
